

Paper: Good Governance Problems and Recent Financial Crises in Some EU Countries

Authors: Dragan Gamberger and Tomislav Smuc

Review: This is an interesting paper concern with a very relevant and topical issue in the field of financial economics. The paper is developed in a scientific manner and has great potential to contribute to the understanding of the recent financial crisis. This study will be indeed a great contribution to policy making. However, the insertion of a section on “Policy Implications” will indeed enhanced the paper. Overall, this is a very interesting and informative paper; it brings indeed a good contribution in the field of financial economics.
